Vaccine Storage Temperature Log (Fahrenheit)

- Check and document temperatures every day site is open. Complete this log with:
 - \checkmark Time of day and initials of the staff person recording the temperatures.
 - \checkmark Minimum (lowest) temperature and maximum (highest) temperature once a day, in the morning before using the vaccine.
 - ✓ Current temperature, twice a day.
 - Mark "X" in the box with the current temperature.
 - If the temperature is too warm or too cold, write the actual temperature in the shaded box, do not use "X."
 - ✓ Write "closed" for days when the site is not open.

Davs 1-15

Location of unit: ______ Month/Year: _____

Site name:

 Take immediate action on any out of range temperatures, including minimum and maximum temperatures.

PIN:

✓ **Stop** using vaccine and and mark it "Do Not Use."

Note: If the vaccine has gotten too warm or too cold, you will not be able to distinguish viable from nonviable vaccine by looking at it.

- ✓ **Document** the details of the temperature excursion.
- ✓ **Contact** manufacturers and MDH for guidance.
- ✓ **Correct** the problem.
- · Review readings weekly for out-of-range temperatures or temperature trends.
- Keep monthly temperature logs for three years with your vaccine records.
