

# Understanding your MIIC Immunization Record

## USER GUIDANCE FOR THE PUBLIC

For more information on accessing your or your family’s immunization record, visit [Find My Immunization Record \(www.health.state.mn.us/people/immunize/miic/records.html\)](http://www.health.state.mn.us/people/immunize/miic/records.html).

## MIIC Immunization Record

The MIIC immunization record that is sent to you contains all the immunization information that MIIC has available at the time it is requested. There are four sections in the record: Demographic Information, Immunization History, Immunizations Comments, and Immunizations Recommended.

### Demographic Information

Generated 12/02/2021 by MIIC

### Minnesota Immunization Report

**Name (L, F)**    **MOUSE, MICKEY**    MIIC ID: 7957558

Date of Birth: 01/08/2012    Age: 9 years, 10 months, 24 days    Gender: F    Org ID: N/A

This report contains immunizations submitted to MIIC. Provider participation in MIIC is voluntary. Please check with your healthcare provider if you notice missing vaccinations. This report should be acceptable to use as proof of immunization for child care, school, and other purposes.

### Immunization History

The “Immunization History” section of the record shows your immunization history. It includes all immunizations submitted by providers that exchange immunization data with MIIC. For a list of vaccine names and abbreviations, review the table at the end of this document.

| Immunization History |             |            |                               |
|----------------------|-------------|------------|-------------------------------|
| Vaccine Type         | Dose Number | Date       | Vaccine (Trade Name)          |
| HepA                 | Not Valid   | 10/10/2010 | HepA, unspecified formulation |
| MMR                  | 1 of 2      | 11/10/2015 | MMR                           |

This report includes several columns of information:

- Vaccine type: Name of the vaccine type (for example, “Influenza”).
- Dose Number: Where the dose falls in a series of multiple doses for a specific vaccine type. Some vaccines require multiple doses to maximize your protection against disease. The number listed explains what dose it is in a series. For example, “1 of 2” means first dose in a two-dose series.

**Note:** COVID-19 doses may show “3 of 2” or “2 of 1.” This indicates an additional or booster dose.

- **Date:** The date you received the vaccine.
- **Vaccine (Trade Name):** The product name of the vaccine you received. Some vaccines have multiple product types (for example: “FLUAD Quadrivalent,” “Fluzone trivalent,” “Fluzone quad high pfree,” “FluMist,” etc.).

### “Not Valid” immunization

Some immunizations may have “Not Valid” listed in the dose number column. This happens when a vaccination does not follow the standards of the Centers for Disease Control (CDC) Advisory Committee for Immunization Practices (ACIP) Vaccine Recommendations and Guidelines (<http://www.cdc.gov/vaccines/hcp/acip-recs/>). A vaccination may be listed as invalid if the:

- Vaccine was given before or after the recommended age.
- Vaccine was given too close to another dose in a series (interval between doses is too short).
- Vaccine was a live vaccine and given too close to another live vaccine (closer than 28 days).

### Immunization Comments

This section of the report shows you the comments entered by your provider. Comments can indicate several things, such as immunity to disease (for example, you had a blood titer that indicated you are immune to Hepatitis A), patient reported history of a disease (for example, you had varicella/chickenpox disease instead of the vaccine), medical exemptions (for example, you doctor has told you not to receive a certain vaccine), and vaccine refusals. Multiple comments can be listed in one record.

| Immunization Comments                 |            |
|---------------------------------------|------------|
| Comment                               | Date       |
| Immunity: Titer/MD Dx Hepatitis A     | 10/01/2010 |
| Pt Report Hx of Varicella/Chicken Pox | 09/15/2011 |
| Medical exemption: Influenza          | 12/01/2019 |

## Immunizations Recommended

This section of your record shows you what immunizations you will need in the future. This section can help you schedule immunizations with your provider to make sure you stay up to date.

MIIC uses the immunization schedules set by CDC to see if you are up to date on your immunizations. The recommended date is when you should be given the next vaccination for that vaccine group.

| Immunizations Recommended |                  |
|---------------------------|------------------|
| Vaccine                   | Recommended Date |
| COVID-19                  | 04/25/2021       |
| DTP/aP                    | 04/06/2017       |
| HepA                      | 04/25/2017       |
| HepB                      | COMPLETE         |
| Hib                       | COMPLETE         |
| Influenza                 | 07/01/2021       |
| MMR                       | 12/02/2020       |
| MenB                      | 04/25/2032       |
| Polio                     | 04/25/2020       |
| Rotavirus                 | MAX AGE EXCEEDED |
| Td/Tdap                   | 04/25/2023       |
| Varicella                 | IMMUNE           |

## Frequently Asked Questions

**Question:** My MIIC Immunization Report does not show all my immunization records.

**Answer:** Because MIIC was created in 2002, many adults do not have their childhood vaccine records in MIIC. Also, if you were vaccinated outside of Minnesota, that information may not be available in MIIC. Immunization information is not automatically transferred from one state to another when you move. Refer to CDC's [Contacts for Immunization Records \(www.cdc.gov/vaccines/programs/iis/contacts-locate-records.html#state\)](http://www.cdc.gov/vaccines/programs/iis/contacts-locate-records.html#state) to find immunization records from other states.

If you have proof of vaccination, visit [Find My Immunization Record \(www.health.state.mn.us/people/immunize/miic/records.html\)](http://www.health.state.mn.us/people/immunize/miic/records.html) for steps on how to get that information added to MIIC or contact your healthcare provider. For clinical advice on immunizations, contact your health care provider.

**Q: MIIC recommends MMR, HepB, Varicella, HepA but I am an adult.**

A: MMR, HepB, Varicella, and HepA are recommended childhood vaccines. Because many adults do not have their childhood vaccination records in MIIC, MIIC may indicate that you are overdue for a vaccine when you are not. For clinical advice on immunizations, contact your health care provider.

**Q: I am recommended for Td/Tdap but I received one in the last 10 years.**

A: Tdap is the vaccine that protects against tetanus, diphtheria, and pertussis in adolescents and adults. DTaP is the version for children. If people don't receive the full DTaP series of vaccines in childhood, a multi-shot series of Tdap is recommended. Because many adults do not have their childhood DTaP records in MIIC, your record may indicate that you are overdue for a dose of Tdap vaccine when you are not. For clinical advice on immunizations, contact your health care provider.

**Vaccine Abbreviations and Names**

| <b>Vaccine as listed in your record</b> | <b>Vaccine Name</b>                      |
|---|--|
| Adeno                                   | Adenovirus                               |
| Adjuvant                                | Adjuvant                                 |
| Anthrax                                 | Anthrax                                  |
| BCG                                     | Bacille Calmette-Guerin (Tuberculosis)   |
| Cholera                                 | Cholera                                  |
| Dengue Fever                            | Dengue Fever                             |
| Diphtheria                              | Diphtheria Antitoxin                     |
| DTP/aP                                  | Diphtheria, Tetanus, Acellular Pertussis |
| Ebola                                   | Ebola Zaire                              |
| Encephalitis                            | Encephalitis                             |
| H1N1 Novel Flu                          | H1N1-09 Novel Influenza                  |
| Hantavirus                              | Hantavirus                               |
| HepA                                    | Hepatitis A                              |
| HepB                                    | Hepatitis B                              |

UNDERSTANDING YOUR MIIC IMMUNIZATION RECORD
