Established by the Minnesota Legislature in 1978, the Family Planning Special Projects (FPSP) grant funds support essential pre-pregnancy family planning services for people with the least access, due to structural inequities. Grants are awarded to counties, cities, and non-profit organizations to provide family planning services in communities throughout the state. More information can be found in the [FPSP Fact Sheet \(https://www.health.state.mn.us/docs/people/womeninfants/familyplanning/grantsfs.pdf\)](https://www.health.state.mn.us/docs/people/womeninfants/familyplanning/grantsfs.pdf).

According to Minnesota Rule, FPSP funds can be used for public information, outreach, counseling, method provision, referrals, and follow-up care. Definitions for each component are included below.

Outreach

Outreach Activities include one-to-one and group activities designed to inform members of the target population about family planning and all family planning services available in the geographic area. This includes presentations at places such as group homes or colleges that provide factual information on reproductive and sexual health, including pregnancy prevention and all contraceptive methods. It also includes meeting individuals at events such as health fairs and providing information on a one-to-one basis. Note: FPSP funds cannot be used for providing any services to unemancipated minors in an elementary or secondary school building.

- Number of people served by both group and one to one meetings: 69,261
- Number of group sessions convened: 1,659

Counseling

Family planning counseling means the provision, on an individual basis, of factual information on pregnancy planning and all contraceptive methods, and the use of non-directive interview techniques to promote optimum health relative to pregnancy planning and contraception.
