

# HEALTH CARE HOMES REDEFINING HEALTH REDESIGNING CARE

## WHAT IS A HEALTH CARE HOME?

A primary care clinic or clinician certified by the Minnesota Department of Health to coordinate care among the primary care team, specialists and community services to ensure patients receive what they need to stay healthy and improve and manage their health.

Health Care Homes provide complete care ranging from disease prevention to management of complex and chronic conditions, and are dedicated to meeting the highest standards for health care delivery.
